Help welcome Spring with a clean and safe environment!
All Systems Fire Protection is prepared to do your Annual Inspection!
Sign up today and we'll do the rest.
It will be the best minute you'll ever spend on your safety and those around you!

ADD A SPRINKLER INSPECTION TO YOUR
SPRING CLEANING TO-DO LIST!

TOP REASONS TO GET AN INSPECTION:

- HELPS YOU STAY COMPLIANT:** The National Fire Protection Association (NFPA) and your local Authority-Having Jurisdiction (AHJ) require periodic testing and inspection. Avoid fines and make sure your system complies with their most recent guidelines.
- INCREASE YOUR INSURANCE COVERAGE ELIGIBILITY:** Many insurance companies may not cover damages caused by fire unless a company has documented periodic inspections and maintenance performed on their sprinkler systems.
- HELP AVOID SYSTEM FAILURE WHEN YOU NEED IT:** 67% of fires are not extinguished due to system failures. Regular testing usually catches system failure causes before it's too late.
- HELPS AVOID NON-FIRE RELATED PROPERTY DAMAGE:** Regular inspections stop damage due to leaks, mold, or damage caused by MIC (microbiologically influenced corrosion).

MYTHS ABOUT FIRE PROTECTION SYSTEMS

MYTH: If one sprinkler goes off, they all go off

FACT: Unlike situations you've seen on TV, sprinklers activate independently and only the sprinkler closest to the fire will spray water.

MYTH: Sprinklers will freeze in the winter.

FACT: The national installation standard provides guidance for proper installation in cold regions. Home sprinklers piping is protected from freezing just as other home plumbing pipes.

MYTH: If you have smoke alarms, you don't need fire sprinklers

FACT: Smoke alarms are essential in every home, but they only detect smoke. Fire sprinklers detect fires and automatically control them to

CUSTOMER TESTIMONIALS:

"Both the field and project management team have been pleasant to work with. They are efficient and knowledgeable which always helps to make the construction process smooth."

- Jule McDaniel, Project Engineer, Rycon Construction, Inc.

"As a general contractor, I have had the opportunity to work with All Systems for the past twenty five years. Their prices are always competitive and the quality of their work excels. I am always confident that the job will be completed professionally, on schedule, and within the budget."

- Danny Brown, MBM Contracting, Inc.

"Reno Bros., Inc. has enjoyed working with All Systems on our project at North Fayette. We have experienced a great working environment and would recommend them to other contractors."

- LuAnn Guzzetti, Reno Bros., Inc.
